

WicketWise

How to Use Guide

A quick, no-fuss walkthrough for players: creating your account, building your cricket profile, joining a team, and following matches, rankings and stats.

1 Create Your Account

- 1 Go to the Sign in page**
Open WicketWise and click **Sign in** in the top right of any page.
- 2 Switch to “Create account”**
Use the tab at the top of the sign-in box to switch from Sign in to Create account.
- 3 Enter your details**
Fill in your full name, email address and a password, then submit the form.
- 4 You're in**
An account, a player profile and a player card are created for you automatically. You're signed in immediately and ready for the next step.

Tip — Already have an account? Just enter your email and password on the Sign in tab instead.

2 Complete Your Player Profile

New accounts are guided through a short, three-step registration so captains can find and pick you for their squads.

Step 1 — Account

- Full name, email and phone number
- Date of birth, gender, nationality and city
- An optional profile picture

Step 2 — Cricket profile

- Batting style (right-hand or left-hand bat)
- Bowling style (e.g. right-arm fast, right-arm medium, spin variations)
- Primary and secondary playing role, preferred batting position, jersey number
- Playing experience and a short bio

Step 3 — Availability

Turn on **Available for selection** so captains can see you in the pool of players they can invite. You can flip this on or off any time from your profile page.

Tip — You can go back a step with the Back button at any point before you finish. Nothing is locked in until the final step.

3 Your Home Dashboard

Once you're signed in, the home page is your starting point. From here you can jump straight to:

- **Live scoring** — matches being scored ball by ball right now
- **Teams** — every team in the club and their rosters
- **Tournaments** — competitions and points tables
- **Rankings** — batting, bowling, all-rounder and team leaderboards
- **Players** — the full player directory

The dashboard also shows overall club totals (players, teams, matches, balls bowled) and a feed of live and upcoming fixtures.

4 Join a Team

You can't add yourself to a team directly — squads work on an invitation basis so captains stay in control of their rosters.

1

Get invited

A team captain sends you a squad invitation once you've marked yourself available.

2

Check your profile

Open your **Profile** page — pending invitations appear in a “Squad invitations” card near the top.

3

Accept or decline

Click **Accept** to join the squad, or **Decline** if you'd rather not. Accepting adds you to that team's roster immediately.

Tip — Browse the Teams page any time to see squads, captains and team colours before you decide.

5 Request Captain Access

Want to create and run your own team? Captain tools (creating teams, inviting players, managing matches) unlock after an admin approves a request.

1

Open your profile

Go to the **Profile** page and find the “Captain access” card.

2

Send a request

Optionally add a short note on why you'd like to captain, then click **Request captain access**.

3

Wait for approval

Your profile shows the request sitting in the admin approval queue. Captain tools unlock automatically the moment it's approved.

6 Follow Matches

The **Matches** page lists every fixture with its current status:

- **Live** — being scored right now, marked with a pulsing live indicator
- **Scheduled** — upcoming fixtures with date, time and venue
- **Completed** — finished matches with a final result

Open any match for its full scorecard. For everything being scored at this exact moment, use the **Live** page — scores there update automatically, ball by ball, with no need to refresh.

7 Notifications

The bell icon in the header keeps you posted on anything that needs your attention:

- Squad invitations from captains
- Responses to your captain request
- Match results and scoring assignments

Click a notification to jump straight to the relevant page, or open the full **Notifications** page to see everything at once and mark items as read.

8 Rankings & Records

Every statistic on WicketWise is calculated automatically from ball-by-ball scoring data — nobody types in an average.

- **Rankings** — leaderboards for batting, bowling, all-rounders and teams
- **Records** — standout individual and team performances across the club

Tip — Numbers update the moment a match is scored, so check back after every game.

Questions or stuck on a step? Reach out to your club admin or captain — they can check your profile, roles and invitations from their side.
